EXPERIENCE

BOOKING.COM Senior Software Engineer, Fintech

April 2023 - Present

- Interim **staff engineer** focusing on cross-team projects in 2025
- **Tech lead for architecture modernization** of legacy backend systems
 - Facilitated the move from **monolith to domain-driven microservices**
 - In 5 projects, 60 modules, 130 APIs, 2K requests/sec, 145K lines of code
 - Drove **architecture vision and prioritization of projects** for yearly planning
- Solved hard engineering problems using Java (Spring Boot), MySQL, Kafka, Redis
 - Built **core workflow engine** for configuration change orchestration
 - **Zero downtime deployments** for critical backend services
 - Reduced CI build time by 50%
- Nurtured company-wide **engineering culture**
 - Helped improve **engineering productivity** (DORA) metrics
 - Engineering **craft mentor** for new joiners and new graduates
 - Presented internal workshops, talks and blogs on engineering topics

STRIPE Software Engineer

March 2022 - April 2023

- Worked on **identity verification platform** used in onboarding of accounts, supporting world-wide regulatory requirements.
- Built a tool for **automated feature parity testing** in APAC countries.
- Worked on backend systems using Ruby, MongoDB, Redis, Kafka.

GOJEK Lead Software Engineer, AdTech

February 2021 - March 2022

- Led development of the **advertisements platform**: ad serving, ranking, telemetry.
- **Sessionization of event streams** for telemetry and rank estimation.
- Service-oriented architecture using Elixir, PostgreSQL, Redis, Elasticsearch.
- Stream processing using Flink, Kafka, Airflow, BigQuery.

HELPSHIFT Data Engineer III

March 2020 - February 2021

- Modernization of legacy Hadoop platform handling 1 PB of data to "Delta Architecture" using Apache Spark, Delta Lake, Databricks.
- Built an **ETL platform** for no-code data pipeline ingesting from multiple sources into the data warehouse with transformations.

HELPSHIFT Backend Engineer III

October 2015 - February 2020

- Built services that handle **30K requests/sec**
- Property-based testing using **QuickCheck** for automated test-case generation and verification

SPAM DETECTION IN TWITTER Internship with Dr Arnaud Legout, Inria

April 2014 - August 2015

- **Master thesis** on detecting spam behaviour by analyzing the Twitter social graph
- Included a 6-month internship funded by **Microsoft Research**.

TALKS/BLOGS

- Talk at **Techcamp Hamburg** on "Property Based Testing to Preserve Invariants".
- **InfoQ article** on designing resilient microservices.
- Talk at **Monster Scale 2025** on "What can flow metrics teach us about building designing resilient systems?"
- Technical blog posts with **95K** reads since 2018.
- Talk at **re:Clojure 2020** on "Building Resilient Services in Clojure".
- Talk at **In/Clojure 2019** on "A Fair Task Execution Framework".
- Three research publications, two on **IEEE**.

EDUCATION

UNIVERSITÉ NICE Masters in Computer Science

2013 - 2015, Nice, France

- Specialized in **Computer Networking**
- **Full scholarship** awarded by Labex UCN@Sophia.

ST. XAVIER'S COLLEGE

Bachelors in Computer Science

2010 - 2013, Kolkata, India

MOOCS

2017 - present

- **Data Engineering** with Google Cloud, 2021
- Ultimate hands-on **Hadoop**: Tame your big data, 2020
- Introduction to **Functional Programming in OCaml** (Université Paris Diderot), 2019
- **Functional Programming Principles in Scala** (École Polytechnique Fédérale de Lausanne), 2017
